Dear families,

It was so nice to see and/or talk with many of you at parent/teacher conferences! Your children are making such great progress! It is fun to watch them grow as learners. We have come upon the winter season. Remember coats, mittens, hats, boots, and ski pants are needed to play in the snow at recess. Students will at least need a jacket now as the weather gets colder. We can’t wait to play on the snow hills hills!

Reminders:

We are continuing our study of the concepts of multiplication and division. We are noticing that multiplication is like repeated addition! Any practice with the flash cards I send home or ones you have bought yourself will be of great help as we learn all of the facts this year.

We are doing a combined project in reading and writing this month. We are researching factual information about reindeer and writing
Please see the attached note about the read at home, the math pages, and the spelling homework. This is a slight increase in your child’s responsibility for homework each night. Each child, unless they have questions, should be able to complete these assignments completely on their own in 30-40 minutes. If they have trouble with that, please let me know. We need to work together to find out what works best to help your child be as successful as they can be! I always say, PRACTICE MAKES PERMANENT. Let’s help them practice good study skills so that it becomes a habit for them to do their work independently. It really does make a difference.

I hope you all have a great holiday season!

Mrs. Taylor
